tence, and the rapid and permanent grow h it has made is something unprocedented in the history of carriage building. Its per-manancy and growth have been accomplished, not by any special effort at "drum-ming" the trade, but by the excellency of the work produced, and by the low price at which this work has been sold. 'Another great feature of its success is in the STYLE of the work produced. It is too often the case that in low priced work the style is correspondingly low or common in appearance, But all goods manufactured by T. T. Haydock, are made in a stylish and artistic manner, thus adding beauty to quality. This firm does not bild the lowest grade, nor the lowest priced work in the market by any means, but is making a specialty of a medium grade full leather top bug ry at a very low price for the quality; and is offering special inducements to the trade to buy in large quantities.
